

# SKY BRIDGE

LIFE SAVING

## Pressure Release Fire Escape Shoot

Sky Bridge is an improved emergency exit system for homes, apartment buildings and retail stores, any building with people.

The door is installed on the upper floors of the building and features a pressure release chute that expands toward the ground level upon activation.

- Safer than stairs
- Faster than stairs
- Can accommodate more people than stairs

The Sky Bridge is the safest and fastest way to escape a burning building. The sky Bridge is enclosed to help shield people from extreme heat because of fire and smoke inhalation. if installed on each floor the elimination of bottleneck at fires escape stairs is greatly decreased and allows higher evacuation volume 3-5 time faster from higher floors.
